

Day 5: Challenge

Earlier, we looked at global mean monthly precipitation. Now, you will look at relative humidity. Create a new notebook and please answer the following questions:

1. What are the ranges of latitude, longitude, and time? Explain briefly what these ranges physically represent.
2. Compare the change in relative humidity between September, October, and November of 1970 and 2020 at the equator and 90°N.
